DETECT THE PERSON BEFORE YOU CAN SEE THEM

Vehicle-to-pedestrian proximity warning for forklifts, reach trucks, pickers, trucks and heavy mobile plant.

A COMPLETE, LOW-RISK SAFETY PACKAGE

CollisionGuard warns both the operator and pedestrian, installs quickly and is backed by a 2-year warranty, free site trial and direct support from the Australian designer and manufacturer.

How CollisionGuard works

- The vehicle-mounted Detection Unit creates a configurable exclusion zone using low-frequency detection designed for industrial environments.
- When a Fob enters the zone, the Control Unit sounds a short siren, flashes an amber strobe and announces “Look out! Person near you.”
- At the same time, the pedestrian’s Fob vibrates and flashes a red LED.
- No direct line of sight is required, allowing warning before a pedestrian becomes visible around vehicles, obstacles and many structures.

Fast retrofit. Simple setup. Broad application.

- Suitable for reach trucks, order pickers, forklifts, trucks, steel rollers, cranes, graders, bulldozers and other mobile plant.
- Rare-earth magnetic mounting and pre-terminated cabling minimise installation time.
- Connects to ignition-switched 12 V or 24 V power. Higher-voltage electric vehicles use the CollisionGuard Voltage Reducer.
- Configuration is done from any mobile phone through CollisionGuard’s own Wi-Fi access point — no special programmer or site Wi-Fi required.
- Universal Fobs are not paired to individual vehicles, so workers can move between equipped vehicles and sites.

STRAIGHTFORWARD PRICING

We show pricing up front so you can quickly decide whether CollisionGuard fits your project before requesting a formal quotation.

Configuration	Best suited to	Price (AUD)	Included
Single Detection Unit Kit	Most forklifts and mobile plant	**$3,120**	Control Unit, 1 Detection Unit, cables/mounting, Driver Isolation Pouch + 1 Fob
Dual Detection Unit Kit	Larger/longer vehicles needing two non-overlapping coverage zones	**$3,600**	Control Unit, 2 Detection Units, cables/mounting, Driver Isolation Pouch + 2 Fobs
Single High-Voltage Electric Kit	Higher-voltage electric vehicle (e.g. 36 V / 72 V)	**$3,228**	Single kit (incl. 1 Fob) plus Voltage Reducer
Dual High-Voltage Electric Kit	Larger higher-voltage electric vehicle	**$3,708**	Dual kit (incl. 2 Fobs) plus Voltage Reducer

COMPLETE VEHICLE KITS
Every Single Detection Unit kit includes 1 Fob and a Driver Fob Isolation Pouch. Every Dual Detection Unit kit includes 2 Fobs and a Driver Fob Isolation Pouch.

Crew and site packages

Recommended package pricing for a single-Detection-Unit vehicle kit with the total number of Fobs shown:

Package	Includes	Package price	Saving
Crew 5	1 vehicle kit + 5 Fobs	**$3,995**	$105
Crew 10	1 vehicle kit + 10 Fobs	**$4,995**	$330
Site 25	1 vehicle kit + 25 Fobs	**$7,995**	$1,005

Additional Fobs $245 each • Replacement Driver Isolation Pouch $89.50 • Voltage Reducer $108 • Dual configuration adds $480 to the corresponding single-kit package and includes a second Fob.

Why two Detection Units?

The dual system is for larger or longer vehicles where one exclusion zone cannot provide the required coverage. Front and rear Detection Units are configured with non-overlapping zones. The Control Unit can identify front/rear detection, but directional information is not the reason for choosing dual coverage.

Portable Detection Products

Portable detection equipment is also available as follows:

Item ID	Description	RRP (AUD)
CG-PDU-A-K	Portable Detection Unit with Battery and Charger	$2,280
CG-BAT-A-13.8V	5AHr Battery for Portable Detector Unit	$218

A HIGH-VALUE OFFER DESIGNED TO REMOVE BUYING RISK

FREE ON-SITE TRIAL
Test CollisionGuard around your own vehicles, blind corners, structures and pedestrian traffic before purchasing.

2-YEAR WARRANTY
Professional industrial equipment backed for two years.

FREE SHIPPING OVER $1,000
Complete systems and normal fleet orders qualify; smaller replacement orders are charged normal freight.

DIRECT DESIGNER SUPPORT
No middleman, overseas help desk, time-zone delay or language barrier.

Fleet Advantage — 10+ systems

- Standard Fob allocation remains included: 1 Fob with each single kit and 2 Fobs with each dual kit.
- A replacement/pool CollisionGuard system and 2 pool Fobs are held at your site and remain AllClear property.
- If a covered unit develops a fault, swap in the pool unit immediately to minimise downtime.
- Return the faulty unit by prepaid courier; AllClear replenishes the pool and repairs the returned equipment.
- The repaired unit can be offered to you at 50% of the current new-unit price to help build your own spare inventory.

More than a vehicle alarm

- Optional time-and-date stamped detection logging with online portal analysis.
- Fixed warning units can be installed at doorways and high-risk areas to warn when an equipped vehicle is nearby — even people without a Fob can see the warning.
- Designed for dusty, dirty and wet industrial environments.

READY TO SEE IT WORK?

Tell us the vehicle type, vehicle voltage, number of vehicles and approximate number of people to protect. We can recommend the right configuration and arrange a free site trial. www.allclearsafety.com.au

All prices are in Australian dollars and exclude GST unless otherwise stated. Specifications, suitability and final configuration are confirmed for each application. CollisionGuard is an additional safety control and does not replace site traffic-management procedures, physical separation or other required controls.
